Education

Postgraduate: 2017/2018 Liverpool University, UK, Geographic data science, Grade 2.1

GIS, Geographic Data Science, Social Survey Analysis, Qualitative Research Methods, Web Mapping and Analysis, Spatial Analysis. As dissertation I participated the CDRC masters research program in collaboration with Boots Company. It involved spatial analysis and statistical modeling to investigate the possibility of prediction patients flows between GP's and Boots pharmacies.

Exchange: 2015/2016 Salford University, UK, Geography

Modules: Remote Sensing, GIS, Advanced GIS, Economic Geography, Earth Surface Processes. My final report investigated the spectral signature of moorland from the Sentinel satellite images, in order to create broader picture of moorlands in Peak district to understand the fire spread.

Undergraduate: 2013/2017 University of Ostrava, CZ, Geographic Information Science, Result: Equivalent 2.1

Modules included all sorts of bases for math, science, physical geography and computer science. I have gained an overview on computer science in relation to applied geography, databases, remote sensing, environmental modelling and GIS. As dissertation I created Wall map of coffee industry in the world, by analyzing and interpreting open source data.
